

**DIRECTIONS**

Carefully cut out both parts of the decoder. Line up the center white dots and use a metal brad or hold in place by hand.

To play, simply spin the center dial to line up the letters to match the Code Key. Each message has its own Code Key. On the messages, the letters under the lines are from the outer ring. Print the matching letters from the inner ring on the lines to find the messages.

Line up the pieces as shown. Use a brad to fasten the pieces together.
